When there was a temporary problem with my sister's waiver, they gave us less then 24 hours notice to pick my sister up. Comprehensive Supports Waiver Program (COMP)	Residential	Residential Supports/alternative living services	We were very unhappy with an organization called CCS or Creative Consulting Services. Perhaps the state should investigate this agency and their unethical practices.

Independent Care Waive Program (ICWP)	Residential	Residential Supports/alternative living services	I think surveys like this should be done before things are put into place. Just recently been notified that caregivers/aides are being forced to work only 40 hours a week or company has to pay overtime. This causes major issues with a person in my situation when there are a shortage of good aides and I have one who is willing to work regardless but can't. Now we are left in limbo for a company to find two aides when the second one is usually never like the first. Really in a bad situation right now as is a lot of people but we were never consulted until the law/rules changed. Why couldn't they be paid overtime through the waivers since a second nurse is having to be paid ---don't quite understand. But thanks for including us in this survey.

Independent Care Waive Program (ICWP)	Residential	Residential Supports/alternative living services	<p>My mother has answered these questions. Many of them don't pertain to me as I live at home with a paid support worker and my mother and father. I have a brain injury and need to rely on my mother and caregiver to make many decisions for me as one of my problems is poor judgement. I really think that there needs to be a different kind of survey for those on ICWP who have a brain injury. For example, I learned to take the bus many years ago, but it ended up not being safe for me to take the bus, so I now have a car provided for me. So, even if someone learns to take the bus, it might not keep them safe. Just an example! Someone needs to be with me whenever I go anywhere or it is not safe. Those are not questions you asked. I have had ICWP caregivers in the past who were not able to keep me safe because they let me leave the home as they were not paying attention and I got into trouble. I was beaten and raped!! That is not the case now as I live with my mother and a responsible caregiver. My mother would be happy to answer any questions and to help you with a more comprehensive questionnaire that would ask questions to</p>

They provide Vickie and her brother with work experiences in house that they otherwise would not have plus they receive wages as part of building self esteem and a feeling of worth. As a bonus they enjoy many types of social activities both in the Center and the community through the efforts of Burnt Mountain Center. We are located in a rural setting as far as having access to community based employment and certainly none that the majority of the participants at the center would have the support to maintain. Currently jobs are not readily available for anyone in this area. I cannot imagine how devastated my children would be should the current status of Burnt Mountain Center change in any way - other than procuring more in house employment.
