

Tentative Schedule

Georgia Medicaid Supplemental Rebate Preferred Drug List Review

Below is a *tentative* schedule that only reflects therapeutic classes of drugs being reviewed as part of the Supplemental Rebate Program. For a comprehensive Drug Utilization Review Board (DURB) Agenda of products to be discussed, please refer to the DCH website (www.dch.georgia.gov) “Drugs Under Review”.

Prior to the scheduled DUR Board Meeting at which a product is to be discussed, First Health Services will provide each manufacturer with a bid packet and all pertinent instructions for completion. Any questions regarding bid packets or the bid process should be directed to First Health by way of e-mail to BrownDo@fhsc.com

All clinical product information should be presented to SXC Health Solutions via NorthStar Healthcare in advance of the DURB meetings at the Forum. Information about this forum can also be found on the DCH website under “Manufacturers’ Forum”. Appointments may be made by e-mail to GAMedicaid@nhc-llc.com.
